

# How to Save Jerusalem

## Torah's requirement and solution

There is a direct Almighty's call to protect people from terrorism: "*You shall not stand idly by your neighbor's blood*" – Vayikra (and He called) or Leviticus 19:16. Despite various rumors and gossips, Torah and venerable Jewish commentary never imply transferring or wiping out Ishmaelites (also known as Arabs). What **Torah does imply and require is to prepare court cases, testimonies and evidences** – see **Sifra** Vayikra 19:16, **Sefer ha-Chinuch** 237, **Rashi** Vayikra 19:16, etc. People claim that it is absurd: Court cases against insane suicide bombers? Ha! You can't even sue insane people – lock them up or shoot them dead! Period!

It's only public opinion against The Creator's commandment. Nowadays we are so arrogant, no effort is put into learning this Torah's directive. Even religious Jews completely ignore this no-excuse no-delay commandment – they replaced it with their own arrogant opinions and talking/praying. That is the reason why the Jews have all the problems, as it was foretold by the prophets. Sifra, Sefer ha-Chinuch, Rashi **require putting maximum resources into preparing these court cases**: "*that is a must for everyone – man or woman; at any time – day or night; anyone who is trying to evade from this activity breaks the prohibiting commandments «Lo Taase»*".

Using the most advanced science we are able to comprehend and fulfill Torah's commandments to save Jerusalem and Israel.

## Terrorism's most powerful weapon

The terrorism's mighty armament in the Holy Land is made of the idea "*Give Palestinian land back to Palestinians*". This intellectual weaponry uses perverted Torah's concept "*Land of Israel*". For over 60 years this weapon in fact beats all the armored combat vehicles, aircrafts, multiple rocket launchers and all other military systems. It overcomes all the efforts of Israeli army, police and intelligence.

This weapon is really powerful just by itself. Besides that, all other terrorism's activities draw their strength, sustenance and finance from this core weapon. Moreover, it gives the terrorists all kinds of excuses for any bloody dirty murders they commit. This weapon also grants them support of many nations and harvest over three billion euro annually (almost one half of the Israeli military budget). **Today that weapon is ready to divide Jerusalem for the sake of another capital and nobody has had a clue how to protect the Holy City...**

## Why "kill them all" and other dreams never work. Terrorism-Formative Systems.

First of all these dreams don't work because you can't kill or transfer all the European Union's foreign ministers and all their people, who decided that Jerusalem should be divided. You have to realize: **Arab terrorists are not the source of the problem; they are cheap expendables of much bigger Terrorism-formative systems**. There are great many desirous pimps who get rich from these multibillion euros flows and more than enough cannon fodder. The loss will always be replaced, if not with Arabs then with Turks, Chechens, Persians – anybody. They don't even have to be Muslims – Japanese and Germans had been there already. If the "Palestinian in charge" was Egypt born *Y.Arafat*, a lieutenant of the Egyptian army, than a regular "Palestinian" could be absolutely anybody, even an eight-eye-six-handed alien from Mars. That's why the more terrorists killing Israel achieves, the faster the number of terrorists grows.

Therefore the current professional approach to kill or to capture terrorists is as meaningless as the approach to clap mosquitoes instead of marsh draining. Killing terrorists is a way to grab military ranks and benefits, win a number of tactical battles, **and yet completely lose the war**. Napoleon Bonaparte had a similar situation in Russia: he won all the battles including famous Battle of Borodino, he completely conquered Moscow, but as the direct result of all these victories he lost the war, his throne and even his personal freedom. That's exactly what is happening now – Israel kills and disarms terrorists very successfully, but as a result faces over 60 years of total strategic losses.

## New effective approaches, goals and solutions

In order to hunt down the veritable source of all the problems (not just the most visible effects), we have to realize five essential things: **1) The "professional" textbooks are in delirium**. Thus, they claim that *J.Trumpeldor* was killed by Arabs in 1920, but the truth is that he along with all the Jews from Tel Hai and nearby settlements were killed by the British who didn't want peace on the border with the French Syrian territory and organized Bedouin's (not Arab's) rebellion in that place. **2) There was no hate between Arabs and Zionist Jews until the British planted in the Holy Land their beloved "Divide and Conquer" doctrine**. **3) Arab-Israeli conflict doesn't even exist, not as a self-sufficient phenomenon**. **4) It's absolutely impossible to win any direct fight with that terrorism's mighty weapon, but we can cleverly amputate it**. **5) Old science and Pentagon knows nothing about intellectual weapon, while trying to develop it since 04/12/1982**.

The new science, Adequate Cybernetics, can control intellectual weapon and systems of any complexity. Using Torah's way it can transfigure the whole system by discovering and amputating the terrorism-formative entities. It creates **smart winning strategy instead of loosing time and lives in endless direct combats**, where the "old good professional approach" has proven to be practically useless.

Because of the intellectual nature of that terrorism's weapon, the best battlefield for capturing it is the court field. It is so not because some court has enough power to solve all the problems, but it's the only battlefield where that backbone of terrorism can be destroyed. It is impossible to achieve the goals in one shot, but it is guaranteed to win everything on technicalities, with the right step by step approach.

**The first case** is returning the brand "Palestine" to the Jews. **This brand is the formative entity for all new claims for Jerusalem. It is very comparable to the Israeli citizenship and it is the only basis for dividing Jerusalem for the sake of another capital.**

This case can be heard as Identity Theft, Stolen Identity, Ghosting, Forgery, Falsum, etc. The easiest way, however, is to start with a "Stolen and found" kind of case, **just to determine the authentic and rightful owner of the brand "Palestine"**.

Right wing or left, no matter what political party you belong to, any real battle for Jerusalem is impossible without this strategic combat since **it's the only way to destroy all the bogus claims for Jerusalem**. This smart engagement is a guaranteed win because:

**A) We have 100% valid and ratified by all the nations Treaty between all the Arabs and Jewish Zionists (Feisal-Weizmann, see below).**

**B) We have determinative international law and major international ruling documents on our side (Mandate of Palestine, see below).**

**C) We have plentiful amount of supporting evidences and exhibits. Here are just a few of the great many of them:**

√ Even the most pro-Arabic "White Paper" of 1939 knows only "*the Arab population of Palestine*" (Section I, The Constitution). As well as Turks, or Kurds, or others, **Arabs by no means were known as "Palestinians". Only the Jews were and still are.**

- √ There is Pinhas Rutenberg's **Jewish "Palestine Electric Company" established in 1923** (by the way that is six years before *Y.Arafat* was even born). Now it is "Israel Electric Corporation" – the major electricity supplier in the region.
- √ Fifty-nine football teams were registered in FIFA for Palestine in 1929. Eleven of them were non-Jewish and none of the non-Jewish teams wanted to be called "Palestinian". Only Shimon Ratner's all-Jewish team obtain the name "**Palestine national football team**".
- √ The very first international game the "**Palestine national football team**" ever played was in Egypt in 1934. The Jewish Zionistic anthem "HaTikva" was played in Cairo for the "Palestine National Football Team" on March 16, 1934 because **every Egyptian was 100% sure – only "HaTikva" may represent Palestine and Palestinians**. There were no hate between Zionistic Jews and everybody else until Perfidious Albion planted terrorism and brigandage. As soon as all-Jewish "Palestine National Football Team" arrived to the Continental hotel in Cairo, the official delegation of the Egyptian Football Federation came to warmly welcome them.
- √ The second official international game the "Palestine National Football Team" played was in Tel-Aviv on April 6, 1934. Both of these games were between Zionistic Jews and Egyptian Arabs, and no hate was ever noticed. **Fuad I, the King of Egypt and Sudan, sent a warm salutatory telegram to the players of all-Jewish Palestinian team**. Now this team is called "Israel national football team".
- √ By the way, **Palestine Football Association (PFA)** was established in **1928**, and now it is known as Israel Football Association.
- √ Gershon Agron's **Jewish newspaper "The Palestine Post"** was founded in 1932; later on it was renamed to "The Jerusalem Post".
- √ **All-Jewish "Palestine Orchestra"** was established in 1936. Now it is "Israel Philharmonic Orchestra". etc., etc...

- D) All the historical maps, including Muslim and Christian maps (e.g. the one on the cover of this book), mark Palestine as Judea and Israel – Jewish lands.** All the maps show Arabian lands far away, far east from Jordan river, on the east side of the Ash-Shura mountains.
- E) The other party has absolutely nothing to show for the brand case** (they may have some real estate claims inside the country, but it has nothing to do with the country capital, symbolism or names). Therefore it's so easy to win this first essential case.
- F) In this case the other party cannot use any emotional arguments like pictures of crying wounded children, pitiful homeless punks, etc.**
- G) It is proven below that even "Day of Solidarity with the Palestinian People" can not legally belongs to the Arabs, but to the Jews only.**

It's totally irrelevant whether or not you like the brand "Palestinian". This brand is the essential part of the mighty terrorism's weapon; so it must be hunt down and taken away. After that Jews should store all their brands in a gun cabinet, or may use the motto "*Palestinian land to the Palestinians*" to collect money for the Jewish settlement movement. The point is to take it away from the terrorists ASAP.

The following benefit is priceless: Winning this particular case in international courts is the basis for the "right" and "left" Israeli political wings to create common platform and mutual understanding. **Finally the biggest dream can come true!** Once we embark on this road and utilize these advanced strategies, we will also win other wars we always lose – the information warfare and PSYWAR.

**The second case:** As proven before, **the Arabs aren't really the problem; they are just cannon fodder in the Europeans' bloody games.** Therefore the second case should be to sue England under the following English law and international law:

First we have to realize that all the professional textbooks are wrong again. Professionals teach us – in one way or another – that British owned the Mandate of Palestine. **That is 100% false.** The British law specifically explained that "*Mandatory*" by no means could imply being an owner. **All the legal definitions describe "Mandatory" via requirements and obligations, not via rights and permissions.**

**In British law** we can refer to the "**Story on Bailm. Sec. 138; 1 Brown, Civ. Law, 382; Halif. Anal. Civ. Law, 70**", or to the "**Mr. Justice Story**", or to **the explanations of Sir William Jones**, or to **the explanations of Mr. Chancellor Kent**, as well as to many other basic laws and precedents. All these sources describe "Mandatory" as not the owner, but the one who "*engages to do some act without reward*" and "*to be when one undertakes, without recompense, to do some act for the other in respect to the thing bailed*".

**The only owners of Palestine were and still are the Jewish people, as it was ratified by all nations in the Mandate of Palestine of 1922.** Britain signed to have all the legal responsibilities and punishments if they break the Mandate, so they should be kept accountable.

This case should have been opened long time ago, at the end of 1922, or in early 1930's, or some time later. *Menachem Begin* was a licensed lawyer. If he hadn't played Boy Scout War Games, but instead opened in 1941 the Mandatory laws violations cases specifically for the interests of the passengers of the Struma ship, he would have saved 768 Jews including 70 kids on this ship alone. **Millions of lives could have been saved, but were not, because the Jews stopped using their brains at some point... A heavy stick, even the nuclear one, isn't as powerful as the intellectual weapon.** This weapon is revealed, invented and engineered by the Adequate Cybernetics.

Numerous illegal cases and reports have been issued against the Jews and their allies. There is a very sore London's court decision against Israeli army lieutenant, *Bedouin Hib al-Heib*. *Hon. Timothy Workman*, the judge from the famous London's Bow Street Magistrates' Court, issued arrest warrant for one of the best Israeli antiterrorist fighter, Major General *Doron Almog*, who had to run away from London Police as a pick pocket criminal or a rapist. Similar run had member of the Knesset, Minister of Defense, Minister of Transportation, Chief of the General Staff of the Israel Defense Forces *Shaul Mofaz*. **Israel had no clue how to defend the soldiers who defend Israel.** Above is the method to completely eliminate any rights of Britain and UN to sue Israel. As the felons, who intentionally created, performed or orchestrated all the illegal activities, Britain and UN have no rights to sue anybody else for the problems.

Thus, not only do we defend Israel, but we can put all the expenses of fixing the situation with the Jewish land on Britain's shoulders. Perfidious Albion should be made responsible at least once for all the terrible actions it has been perpetrating on a regular basis.

**The third case** is the case against UN, because UN breaks its own Charter (e.g. Article 80) and many other laws with its resolutions about Israel. This case also supports the first two, proving once again that the only legal basis for Palestine is the League of Nations Mandate, where the Jews are appointed as the only people to own all of Palestine. We also need this case in order to create new legal foundation for Israel, because the current Declaration of Independence is just terrible (as well as the UN resolution 181 (II), etc, etc, etc.).

Especially important for the officials and ranking officers

We finally created and verified all the solutions (first steps are presented here). No other solution ever existed. Any official who doesn't support this on a maximum resources full scale basis must be considered a traitor and a saboteur right by the definitions of these words.

### How to win these cases and the informational war

I advise following these cases with the perception KISS – Keep It Simple Stupid. It is the win-win technique to handle such cases and to automatically win the informational and psychological warfare (which Israel always loses up to now). All the response to any side argument should be "We reserve all the rights" and **never ever fall for any small talks until the very end of these cases.**

Here is my advice on how to surmount stupid mistakes made by professional lawyers. The fact that the Jews – under tremendous pressure – had to sign some documents where the word "Palestinian" referred to non-Jewish people just means that the Jews were raped, once again being the hostages of the Europeans. In Auschwitz (Europe) the Jews also worked at the factories of death (in the crematoria, and even managed to blow one up). That work doesn't mean the Jews provided their support to what was happening at Auschwitz.

My next advice to this case is not to try to completely brush away all the possible pretenders for the "Palestinian" brand, but instead establish the chain of inheritance. Thereon prove the first one in the chain. Then everyone will have to come to the appropriate conclusion on the basis of huge amount of consistent documents. The determinative documents and evidences are:

- A) Arab-Jewish Treaty on Jewish Homeland made between all the Arabs of the territory and the Jewish Zionists (Feisal-Weizmann).
- B) The League of Nations' Mandate of Palestine, issued to the Jews, with Britain as the Mandatory (volunteer bodyguard and money guard with all the responsibilities but no revenue, no benefits). Together with the Treaty it was ratified by all the nations.
- C) Various old maps and other essential historical evidences (lots of detailed descriptions and explanations are provided in the book).

Based on The Treaty and The Mandate, supported with all the evidences and exhibits, everyone has no other option but to acknowledge that the very first and the only owners of the Palestinian capital are the same Jews! Q.E.D. and I rest my case – **Jerusalem is saved!**

Here is my advice on handling Arabic papers which may still try to address some heritage issues. Get agreed right away that behind the Jews, few other nations theoretically could be in the waiting list for the "Palestine" brand. These are: Assyrian, Samaritans, Greeks, Turks – all of them were present at that territory long time ago and are alive now (although everybody know that these are not the direct descendant of the ancient Greeks, Assyrians, etc.). Besides these people, we do have big crowd of fall-behind nations and communities, such as: Bedouins, Druses, ancients Crete island residents, Kurds, Armenians, Arabs, Circassians, Chechens, Slavs, various Christians.

The Arabs will definitely be somewhere at the very end of the list, because they are really new to that territory. That's not a surprise, since they have their own Holy Land – Medina and Mecca (Al-Makkah). Their prophet *Muhammad* lived there and anyone who insists, that during his most significant 20-30 last years Arabs left him for other places is making dirty filthy affront of Islam, Koran and Arabs.

All the historical evidences state that *Muhammad* has never been to Jerusalem, and same goes for his horse. There are few kids' tales about his horse flying to Jerusalem, but it's much easier to believe into flying Santa sleigh than into that self-guided missile horse.

Until the year of 635 there were no Arabs on the Palestine territory at all – they were just not interested in this small shred of land. There were no any Muslims on that territory as well. First of all because Islam is a young religion. And second – all the Muslims were too busy with the battles for Mecca. Then they were too busy with the personal communication with *Muhammad*.

In the year of 632 *Muhammad* is dying. In that time Jerusalem was exclusively Christian and Jewish city. There was St. Mary's Church on The Temple Mount and not a single mosque in the Jerusalem or anywhere in its surroundings.

After *Muhammad* death the Muslims from non-Arab ethnic groups become less comfortable in Mecca, Medina and the surrounding areas (since nobody likes foreigners). They had no reason to stay in Arab lands and started on their way to other countries. This way Muslims for the first time came into Jerusalem and Palestine. It's very natural that in overwhelming majority they were not Arabs.

The very first Muslim leader, ever arrived to the Palestine, *Muawiyah*, was not an Arab. Mecca's Arabs called him and his descendants "ad-Dakhil" – aliens. *Muawiyah* had to color his hear not to look too flaxen-haired. Mawalis, Arabic word for non-Arabic Muslims, also goes after him. *Salah ad-Din*, known to Crusaders as *Saladin*, was Kurd – an Indo-European, not an Arab by all means. Same goes to all the original Muslims (not forcefully converted Jews or Christians) there. *Umar*, the greatest Arabic Amir, once passed by Jerusalem. He was shocked to see how blond local Muslims are. He ordered them to powder faces with dust and mud at least to look Arabic.

All the previous researchers use statistical approach and demographic argumentation, which proves the same point, but is not very suitable for the court hearings. Court requires individual names, better being accompanied with the eye-witness testimonies or appropriate affidavits. So I had to perform series of huge researches with new methods and approaches never used before. Small parts of these researches are presented here. It proves that **Palestine never ever been Arabic, it's perpetual and venerable Jewish Homeland.**

It is very important to realize, that Arabs never ever questioned the Arab-Jewish Treaty, because there is no way to question a treaty, signed by the head of the Arab authorized delegation and lately ratified by all the nations, including the former sovereign – Turkey.

The findings are very unique and valuable, as you have seen already. Much deeper understanding of the legal documents has also been accomplished. For example, no researchers noticed earlier, that the Arab-Jewish Treaty proves that Arabs never considered Palestine to be an Arab State or Arab Kingdom or anything alike, because "Palestine", "Arab State" and "Arab Kingdom" are listed as different legal parties in the Treaty. Also it was not noticed earlier that the appendix (the Feisal's handwriting) doesn't belong to the actual Treaty, it only explains possibilities of Feisal's personal participation in prompt implementation of it. Therefore it has signature from one side only. Feisal never asked Weizmann to sign that appendix and never expressed any discomfort with this page having only one signature.

Anyway, everything that Feisal mentioned for the Arabs was done. There were no problems with Jewish Homeland whatsoever, but Britain stole 76% of Jewish land and paid with it to British spy in Turkish parliament – Feisal's brother Abdullah. By performing this theft Britain broke the Mandate and the treaties it signed. **Britain should take full responsibility for this crime.** Britain created and orchestrated all the problems and it may be forced to reimburse this burglary with some of British islands, say Falkland Islands. They have almost no population but are priceless as the key to plentiful mineral deposits, e.g. uranium. If Israel just announces future intention to use these islands together with Argentina, the whole Latin America, as well as Spain and Portugal become Israel friends forever.
